## BIC2000 Series SmartServe™ Blend-in-Cup

Say  
Goodbye  
to Blender  
Jars

by Blending in the Cup

**Blends in disposable cups:** everything you put into the cup is served to the customer, no more wasted ingredients left in blender jars.

**Simple process:** dispense ingredients into cup, insert cup, and press "start", serve the customer. Equipment automatically rinses itself.

**Significant savings:** minimal labor, no wasted ingredients, and as little as 10oz/300ml of water to completely rinse between drinks.

For more Good Thinking® visit [www.commercial.hamiltonbeach.com](http://www.commercial.hamiltonbeach.com)

**DRINK PREP PROCESS:**

**1 Start with disposable cup**  
Can use plastic, paper and even foam cups.

**2 Add ingredients**  
Can include nugget ice, frozen fruit packets, fruit concentrate, etc.

**3 Insert cup into machine, press start, serve customer.**

**BENEFITS:**

- Labor Saving**  
SmartServe™ has an output of more than a drink a minute.
- No Waste**  
Everything you put in the cup is served to the customer compared with up to 10% waste with blender jars.
- Space/Jar Saving**  
Requires only 7.5" of counter width plus no more blender jars to store.
- Self Rinsing**  
Operators can engage customers while the programmed equipment rinses itself between each drink with as little as 10oz/300ml of water.
- Consistent Output**  
with a perfectly controlled process. Blend parameters can be changed easily via USB port.
- Water Savings**  
Compared with manual cleaning, SmartServe™ can cut water usage by 8X.
- No Dispensing**  
The step of pouring from the blender jar is completely eliminated.

**BIC2000 SERIES BLEND-IN-CUP with SELF RINSING**
